

Economic Development

Town of Collingwood Economic Development Office

## Community Profile

### Sustainability

#### **The Four Pillars of a Sustainable Community are: Economy, Culture, Social, Environment.**

Over the last two decades, the Town of Collingwood has experienced a population explosion. With a fast-growing human resource base, and its potentially dynamic and rapidly expanded employment, Collingwood has developed a Sustainable Community Plan to steer the Town in a corporate direction with respect to sustainable initiatives, and to position Collingwood as a leader in Ontario.

Over the next 40 years, we want Collingwood to be a community with:

**Strong municipal leadership and transparent governance structures**

**The ability to attract and retain a diverse and healthy mix of residents of all ages, genders and ethnicities**

**Meaningful and productive partnerships with other orders of government and stakeholders**

**Viable local employment options**

**Affordable and accessible opportunity for involvement in arts, cultural and recreational activities**

**A valuable and memorable experience for visitors**

**A high degree of 'walkability' and alternate modes of transportation besides a single-use vehicle**

**A high degree of social cohesion and a common identity**

**Protected natural features and a compact urban form**

**Solid investments in infrastructure**
